

Thank you for downloading the TH2 White-Knuckle FREE Bass Presets. To install the presets please do the following:

1. Open TH2 and select the Factory button on the left side of the screen:

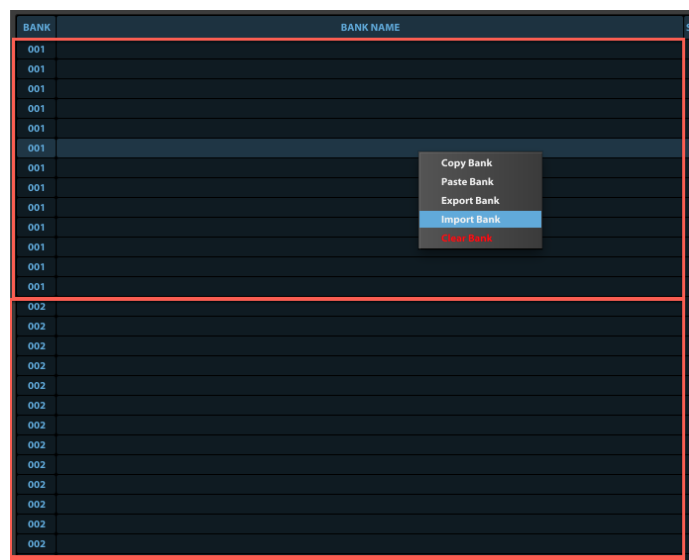

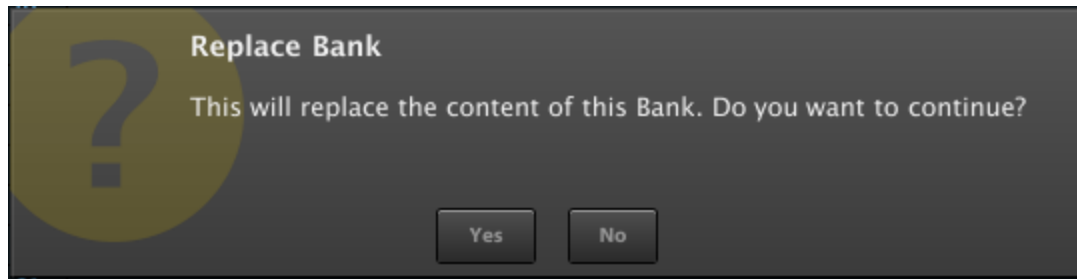

This changes TH2's view to User presets.

2. On the right side of the screen select Search:

3. Inside of this view right click on the Bank area and select Import Bank. **Make sure to select a blank bank or you will erase any previously saved presets.**

4. Locate the “White-Knuckle Bass Presets.xml” file on your computer and import it.

After that you should have 50 new presets for your TH2 rig. Enjoy!
